

U of M Student Sport Survey

Samantha Schlicht

Introduction

A survey was constructed to examine student involvement and feedback at college sporting events.

The survey began with demographic questions then moved on to questions about preference, involvement, and feedback.

There was a small sample size of 6 students, which were chosen at random.

Results

Male or Female	Year in school	What your favorite sport to watch at the University?	How often do you attend game/match/etc for that sport?	How much fun do you have at this specific sporting event?	What would you like to see improve with this sporting event?
Male	Junior	football	1-2 times per season	4	n/a
Female	Junior	Football	5 or more times per season	5	More spectators towards the end of games!
Female	Junior	baseball	3-4 times per season	5	An actual student section
Female	Sophomore	Football	5 or more times per season	4	More food variety
Female	Freshman	Football	5 or more times per season	4	Improve seating
Male	Senior	Basketball	5 or more times per season	5	More student involvement/attendance.

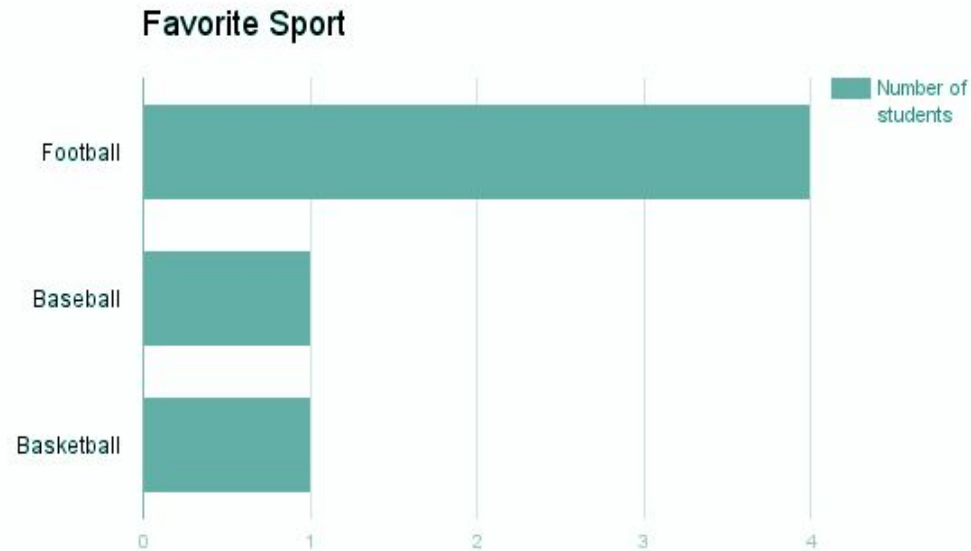

Interpretation of Results

Year in School

50% of the students taking this survey were juniors, which could have an effect on the data that was collected

Favorite Sport

67% of the students said that football was their favorite sport to watch.

This could have been affected by the sample size and demographic.

Conclusion

Although the sample size was small and not random, football was chosen to be the most preferred sport to watch with 67% of students choosing that sport.

This experiment could be conducted again and yield different resulting, depending on the sample group.
